ZANE DOXFORD

Cyber Security Student

Gold Coast, QLD | zane.doxford@griffithuni.edu.au

linkedin.com/in/zane-doxford-9a80022ba | zanedoxford-hub.github.io | Australian Citizen

PROFILE

Cyber Security student at Griffith University (graduating mid 2027) with hands-on project work in Active Directory penetration testing, Splunk incident investigation, OT/ICS security and AI security research, plus a software engineering internship building Python automation. Seeking a graduate, internship or entry-level IT or security role on the Gold Coast or in Brisbane.

EDUCATION

Bachelor of Cyber Security Expected mid 2027

Griffith University, Gold Coast · 180 credit points completed

Certificate II in Sampling and Measurement, Leichhardt

PROJECTS

Prompt Injection Forensics in Large Language Models | Trustworthy AI 2026

- Simulated four prompt injection attack types on a RAG pipeline (Qwen2.5, PyTorch, Hugging Face) and built a forensic tool that locates injected payloads from token-level cross-entropy spikes.
- Cut attack success from 62.5% to 25% with a dual-stage defence; the tool located 100% of injections (F1 0.80).

Active Directory Penetration Test | Ethical Hacking 2025

- Went from anonymous access to Domain Admin via LDAP enumeration, AS-REP roasting, a BloodHound ACL-abuse path, Impacket secretsdump and pass-the-hash; reported remediations.

SOC Investigation & Threat Intelligence in Splunk | Incident Response 2025

- Wrote SPL queries and dashboards to detect and geolocate unauthorised access; traced a compromised workstation to the malicious file and sender.

OT / ICS Security Assessment: Water Utility | OT Security 2025

- Inventoried SCADA, PLC and RTU assets, reported 11 risk-ranked vulnerabilities, and checked compliance with IEC 62443 and AESCSF.

Cryptanalysis & Python Crypto Toolkit | Cryptography 2026

- Broke Vigenère and substitution ciphers using Kasiski examination, Index of Coincidence and frequency analysis; built a Python toolkit for RSA, Diffie-Hellman, ElGamal and ECC calculations.

EXPERIENCE

Software Engineer Intern 2025 – 2026

City University of Macau

- Researched and prototyped a Python system to test how well CAPTCHA challenges resist automated solving, using web scraping libraries and API integrations.

Landscaping Assistant (Casual) 2022 – 2024

AAMS

- Managed billing, accounts and scheduling, and handled client communications and queries.
- Worked across varied job sites requiring problem-solving, adaptability and attention to detail.

Volunteer 2023

Oxenford Community Centre

TECHNICAL SKILLS

- **Offensive:** Kali Linux, Nmap, Burp Suite, Metasploit, BloodHound, Impacket, John the Ripper
- **Defensive:** Splunk (SPL), Wireshark, ClamAV, incident response, threat intelligence, log analysis
- **Programming & AI:** Python, PyTorch, Hugging Face, scikit-learn, C#, PHP, Bash, MySQL
- **Systems:** Active Directory, Linux (Apache, BIND9, Squid), Microsoft Azure, SCADA / ICS
- **Governance:** ISO 27001 / 27002, NIST, IEC 62443, AML/CTF Act, GDPR

CERTIFICATES & TRAINING

- National Police Check • C class driver licence (P2) • CPR
- Aboriginal and Torres Strait Islander Cultural Certificate • CALD, LGBTQI and Cultural Competency training

AWARDS

- Academic Excellence Awards 2022 and 2023, and IT Excellence Program 2019 – 2020, Pacific Pines State High School
